

RICH⁺ Flori Zen

RichPlus
Sustainable Solutions
Empowering a greener future

More Flowers and More Fruits

-  RICH⁺ Flori-Zen improves flowering and increases the fruit/grain/pod setting, resulting in higher yields of better quality and tastier produce.
-  RICH⁺ Flori-Zen is even more effective as the fermented formulations are much more easily absorbed and digested by the plant system for maximum results.
-  Sprayed at the flowering and fruiting stages, RICH⁺ Flori-Zen improves and energises the plant system to initiate better flower and fruit-set, resulting in produce of higher quality and increased yields.

RICH⁺ Flori Zen

More Flowers and More Fruits

-  RICH⁺ Flori-Zen is 10–12 times more effective than a comparative soil application, when sprayed at the productive stage and directly enters into the plant system through the leaves.
-  It triggers an early and profuse flowering, with a lower incidence of flower-drop. Often, blooms are larger with deeper and brighter colours.

RICH⁺ Flori Zen

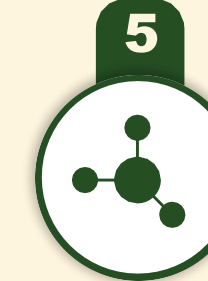

Benefits

- 

Promotes **profuse flowering**
- 

Increases **flower-to-fruit/grain ratio**
- 

Increases **fruit/grain setting**
- 

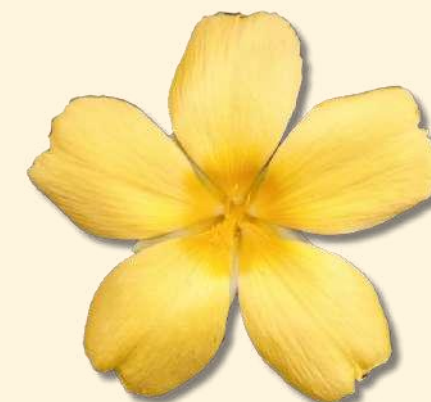

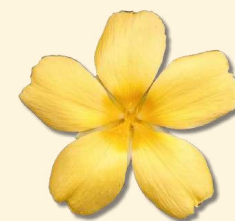

Energises the plant **metabolism**
- 

Ensures the correct functioning of **enzyme systems**
- 

Improves **temperature** and stress resistance
- 

Improves produce **quality**
- 

Helps realise **yield potential**

How to Apply

DILUTION RATIO

One litre RICH⁺ FLORI-ZEN
with minimum 100 litres
water (max. 200 litres)

STANDARD DOSAGE FOR ONE ACRE

- 500ml FLORI-ZEN + 100 litres of water (Max: 200 litres)
- Spray 50–70ml per pump in 7–10 pump sprays per acre
