

RICH⁺ Tuber Gro

Large Tubers and Early Harvset

-  To promote bulking of tubers and maturation and improves produce qualities while preventing loss in yield due to weather stress.
-  Accelerated tuber maturation leads to early harvest. Produce is more temperature resistant and retains freshness for a longer shelf and storage life
-  RICH⁺ Tuber-Gro works to divert plant energy from vegetative growth to tuber production, rapidly translocating carbohydrates from leaves to tubers.
-  There is a marked increase in uptake of natural sugars and mineral nutrients leading to increase both in size and in quantity as well as quality of yields.
-  RICH⁺ Tuber-Gro produces uniform growth of tubers and bulbs.

RICH⁺ Tuber Gro

Benefits

Increase in
**solids, tuber
size and weight**

Better **resistance**
to disease,
skin-cracking &
spoilage

Increase in
**tuber sugars
and taste**

More **uniform
growth** of
tubers

Early
harvest-to-market

Tubers are more
**temperature
resistant**: retain
freshness

Longer **shelf
and storage life**

Increase in
revenues for
growers

RICH⁺ Tuber Gro

Dosage for Spray or Drip Application

Increase in solids, tuber size and weight

Minimum Dilution

1:100 in water

Short duration Field Crops

Onion/Groundnut/Root Vegetables: Spray 500 ml.
per acre @ bulk/pod bulking and maturation stage,
approx. 2–3 weeks before harvest.

Basic Dosage

500 ml – 1 litre per acre
