

RICH⁺ MICROBE PLUS KELP PREMIUM

LIQUID NUTRIENT FERTILISER

- RICH⁺ Microbe Plus® Kelp is a liquid nutrient fertiliser created through a unique process that blends and digests high-grade soluble kelp powders with beneficial microbes, fungi, and bacteria.
- This process results in a high-nutrient, biologically active fertiliser that enhances plant growth, improves soil health, and boosts resistance to stress and frost.

RICH⁺ MICROBE PLUS KELP PREMIUM

Usage & Benefits

- **Enhances Plant Growth & Resistance** – Contains high concentrations of plant hormones like cytokinins and gibberellins, stimulating plant growth and increasing resistance to stress, frost, and soil-borne pathogens.
- **Improves Soil Health** – Kelp aids in breaking down cellulose and other organic materials, increasing humus formation, improving soil structure, and enhancing water retention.
- **Boosts Nutrient Uptake** – The microbially digested nutrients make them 100% available to plants, improving absorption and efficiency.
- **Environmentally Friendly** – Non-harmful to worms, bees, and insects, making it safe for sustainable farming.

RICH⁺ MICROBE PLUS KELP PREMIUM

Dosage Recommendations

- **Horticultural Crops:** 3 - 4L/ha, applied 3-4 times (pre-flowering, post-flowering, and fruit enlargement).
- **Broad Acre Winter Crops:** 2 - 3L/ha, applied twice (mid-tillering & booting – grain filling stage).
- **Broad Acre Summer Crops:** 3 - 4L/ha, applied 2-3 times (pre-flowering, post-flowering & grain filling stage).
- **Annual & Perennial Pasture:** 3 - 4L/ha, applied 3-4 times post-grazing
